Contents

| | |
|---|------------|
| <i>Foreword</i> | <i>v</i> |
| <i>Preface</i> | <i>vii</i> |
| 1. Environment and Climate Change: Kerala Scenario <i>Jude Emmanuel</i> | 1 |
| 2. Current Status of Water Resources in Kerala <i>Anila George</i> | 7 |
| Impact on Groundwater | |
| 3. Analysis of Physico-chemical Characteristics of Groundwater Samples of Pallikal Grama Panchayat, Thiruvananthapuram, Kerala <i>Jasmeya Beevi, M.V. Vincy and Brilliant Rajan</i> | 19 |
| 4. Analysis on the Bacteriological Contamination in Groundwater Owing to Sewage Pollution: A Case Study <i>S.B. Swathy, V. Smitha Asok and V.S. Faseela</i> | 25 |
| 5. Study on the Drinking Water Issues of a Coastal Locality of Purathur, Malapuram, Kerala <i>P.S. Sudina and Jainy Varghese</i> | 29 |
| 6. Distribution of Heavy Metals in Sediment Samples of Aquifers in Chavara, Kollam <i>D. Meera and Sherly P. Anand</i> | 35 |

7. **Impact of Climate Change on Recharge Pattern of Kinathukadavu Block of Walayar Sub Basin, Tamil Nadu** 39
A. Valliammai and B.J. Pandian

Impact on River System

8. **Water Quality Assessment of Selected Sites of Ithikkara River of Kollam District, Kerala with Special Reference to Bacteriology** 57
Anila George, P. Bindhu and S. Sreethi
9. **Water Level Fluctuations and Bacterial Distribution in Quaternary Aquifer along Pampa River** 71
G. Madhusoodanan Pillai, A.S. Pramodh Lal, M. Karthik, M. Aravind and Jeffy Selvan
10. **Study of Hydro-chemical Properties of Neyyar River, Kerala: An Attempt to Estimate Pollution Status** 79
M. Badusha and S. Santhosh
11. **Diversity and Distribution of Ephemeroptera Larvae in the Post-Monsoon Season from Achenkovil River, Kerala** 85
S. Sujitha, R. Sreejai, F. Jency Roshan, Beena S. Kurup and Dani Benchamin
12. **The Hydrochemistry and Planktonic Diversity of Gangayaar Stream with Special Reference to Different Pollution Sources** 91
A.S. Arya, V. Kaladevi and S.S. Preetha
13. **Systematics of Benthic Fauna in Achenkovil River: A Segmental Approach** 101
Beena S. Kurup, R. Sreejai, Dani Benchamin, F. Jency Roshan and S. Sujitha
14. **Fishery of Malabar Labeo, *Labeo dussumieri* (val) from the Major River Systems of Kerala, India** 105
C.R. Renjithkumar, K. Roshni, K. Ranjeet and B.M. Kurup

Impact on Wetland System

15. **Human Interferences in Wetland: A Case Study on Lake Veli** 111
J. Fouzia and G. Prasad
16. **Geophysical Quality of Selected Areas under Kuttanad Wetland Region** 115
T. Alexander
17. **Qualitative Analysis of Water Resources of a Selected Region** 125
Y.B. Sheeja

18. **Diversity Indices for Pollution Assessment: A Case Study from Vembanad Wetland Adjacent to the Seafood Processing Facilities** 129
V. Vidya, G. Prasad and Meera

19. **Phytoplankton Diversity of Kottakayal Wetland of South Kerala** 147
F. Jency Roshan, R. Sreejai, Dani Benchamin and S. Sujitha

Impact on Soil Health

20. **Effects of Organic Amendments Inoculated with Trichoderma Fungal Microbial Consortium on Reclamation of Clay** 157
V. Kaladevi, L. Soumya and S.S. Preetha

21. **Spatio-temporal Dynamics of Land Use/Land Cover Pattern in Greater Cochin Region: A Geospatial Approach** 167
Naveen S. Lal, John Richard Thomas, Sumith Satheendran, Abin Varghese, Usha K. Aravind and C.T. Aravindakumar

22. **Physio-chemical Parameters of Soil during Various Seasons in Grassland Habitat of Southern Kerala** 173
Nisha Thomas and M.G. Sanal Kumar

23. **A Preliminary Study on the Importance of Physical Characteristics of Soil Samples Collected from Different Ecosystems** 179
C.P. Sreelekshmi and R. Sreejai

24. **Ecotoxicological Effects of an Herbicide (Glyphosate) and Fungicide (Fytran) on *Philoscia javanensis* (Isopoda)** 185
B. Bini and M.G. Sanal Kumar

25. **A Comparative Study on the Mineral Analysis of Environment Friendly Seaweed and Seagrass Liquid Fertilizers** 193
Y.B. Sheeja

Impact on Natural Habitat

26. **A Study on Health Issues of a Population around a Cashew Factory** 199
Renju Raju and R. Sreejai

27. **A Comparison of Health Benefits of Native and Exotic Fruits** 203
Ayona Jayadev and Jincy Rose

28. **Impact of Human Intervention on Butterfly Diversity in Natural Habitats** 213
P. Pournami and G.P. Mathen

| | |
|---|------------|
| 29. Identification of Native Earthworms and its Effect on Plant Growth | 221 |
| <i>Anupriya Samuel, S.S. Saranya, S. Abhijith, R. Abhijith, J.S. Ajinu, T.R. Dhanya, E. Haleema and M. Vishnu</i> | |
| 30. Development of Cloud-GIS Based Veterinary Information System for the Selected Regions of Kannur District | 237 |
| <i>A.K. Abdul Murshid, G. Anusha, P.T. Fathah, Roshiny Stanly, S. Sumith Satheendran and Abin Varghese</i> | |
| 31. Monitoring Ecological Changes with the Help of Butterflies | 241 |
| <i>R. Sreejai, Kripa Susan Babu, Dani Benchamin, F. Jency Roshan, S. Sujitha and Beena S. Kurup</i> | |
| 32. Histopathological Impact of Organochlorine Pesticide (DDT) on the Ovary of Freshwater Fish | 247 |
| <i>G.S. Remya Devi</i> | |
| 33. A Review on the Applications of Environment Friendly Drug Delivery Systems in Medicine with Special Reference to Nanopatches | 251 |
| <i>J.K. Reshma, N. Najula Nazeer, S.L. Aleesha Fathima and Anju V. Jalaj</i> | |
| <i>Literature Cited</i> | 255 |
| <i>Annexures</i> | 283 |
| <i>Index</i> | 301 |
| <i>Color Plates</i> | 305 |

Chapter 20

Effects of Organic Amendments Inoculated with *Trichoderma* Fungal Microbial Consortium on Reclamation of Clay

V. Kaladevi¹, L. Soumya¹ and S.S. Preetha²

¹Department Of Environmental Science, St. John's College, Anchal, Kerala

²Department Of Botany, St. John's College, Anchal, Kerala

Soil is an integral part of an ecosystem and it is considered as the most important gift for the survival of mankind. All the basic needs and the habitats depend on the soil, but the human interactions adversely affect the characteristics of the soil and destruct the soil health and wealth. Soil reclamation is a method used to return disturbed land to a state, where it is useful. A pot experiment was conducted on soil samples to compare and assess the reclamation ability of different organic amendments and their combinations inoculated with *Trichoderma* fungal microbial consortium for soil quality improvements. Controlled conditions were compared with the media prepared by mixing soil with sawdust, cow dung, coir pith, and vermi-compost in various combinations. Organic amendments were applied at 50 per cent of soil weight and these organic amendments with soil kept to amelioration for 100 days. After the amelioration process the soil quality improvements and compost stability was checked by planting a pea variety (*Pisum sativum*) and was grown in these seven pots including control. Results obtained for *Trichoderma* microbial consortium inoculated soil samples showed the significant differences in bulk density, moisture content, water holding capacity, pH, EC, TDS, TSS, organic carbon, organic matter, and NPK among the treatments and the control showed a decline trend in all the properties. Organic amendments singly or in combinations
