Subject: Proper waste disposal inside class rooms and college campus

There have been complaints from the cleaning staff that the students are disposing waste paper and plastic bottles inside the class rooms and campus negligently and causing difficulty in proper cleaning. Hence the students are strictly directed to dispose the waste materials in the dustbins provided inside the class rooms and in the campus. Avoid carrying plastic bottles instead use steel bottles to carry drinking water. Reduce the usage of plastics.

Cleanliness is a habit, not an option
